

Syed Fazlay Rob Shabok

Full-Stack Developer

Dhaka, Bangladesh | syed.shabok@gmail.com | +8801751505247

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Summary

Enthusiastic MERN Stack Developer with a strong foundation in JavaScript (ES6+), React, Node.js, Express, and MongoDB, currently focused on building real-world, user-centric web applications. Experienced in developing full-stack projects involving RESTful APIs, authentication systems, and responsive UI design while following clean, maintainable coding practices. Passionate about collaborating in team environments, participating in code reviews, and continuously learning modern tools, Agile workflows, and software development best practices.

Technical Skills

Language: JavaScript (ES6+), C#, C++, Java

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST API, JSON Web Token, MongoDB

Tools: Git, GitHub, VS Code, Figma, Netlify, Vercel

Soft Skills: Quick Learner, Problem Solving, Attention to Detail, Adaptability, Critical Thinking

Projects

1. Tikify - Transport Ticket Management Platform

[Live Link](#) | [GitHub \(Client\)](#) | [GitHub \(Server\)](#)

Description: Developed a premium full-stack platform for booking and managing transport tickets with secure transactions and comprehensive role-based access control.

Tech: Next.js | React | Node.js | Express.js | MongoDB | Stripe API | Tailwind CSS | HeroUI | Better Auth | JWT

Key Features:

- Role-based Dashboards– Manage platform access with dedicated interfaces for admins, vendors, and passengers.
- Secure Payments – Process ticket transactions seamlessly and securely using Stripe API integration.
- Dynamic Route & Seat Tracking – Search and filter routes, view live seat availability, and track upcoming trips with interactive departure countdowns.

2. Idea Vault - Startup Idea Sharing Platform

[Live Link](#) | [GitHub \(Client\)](#) | [GitHub \(Server\)](#)

Description: Developed a community-driven platform for sharing, discovering, and validating startup ideas through user engagement and feedback.

Technologies: Next.js | React | Node.js | Express.js | MongoDB | Better Auth | JWT | Tailwind CSS | HeroUI | Vercel

Key Features:

- Idea Publishing – Create, edit, and manage startup ideas with detailed information.
- Community Engagement – Upvote and comment on ideas to provide feedback and validation.
- Search & Discovery – Browse and search ideas to quickly find relevant concepts. Trending Ideas - Discover popular ideas ranked by engagement and recent activity.

Work Experience

Game Development Intern – FunFuse Games LLC

(Oct 2025 – Mar 2026)

- Engineered responsive UI systems and complex game mechanics using C# and Unity, directly contributing to the performance and interactivity of mobile applications.
- Collaborated within an Agile team of four, utilizing Git version control to manage development workflows and streamline feature delivery in weekly sprint cycles.
- Executed rigorous testing and debugging protocols, resolving critical bugs to significantly improve application stability and end-user experience.

Education & Certifications

Bachelor of Science, Computer Science and Engineering

January 2026

Independent University, Bangladesh | Minor: Big Data | CGPA: 3.75

Full-Stack Web Development with JavaScript (MERN)

January 2026

Ostad | [Certificate](#)

Awards and Achievements:

Dean's List (4×) - Top academic performance across multiple semesters

Vice Chancellor's List (2×) - Awarded for exceptional GPA and consistency

Languages

Bangla (Native) | **English** (Fluent) | **Hindi/Urdu** (Conversational)
